

Introducing WHITEC:

Your Technology Connection Partner

WHITEC is here to assist you.

You know that your practice needs to use electronic health information technology. WHITEC, your regional extension center (REC), is here to assist all health care professionals practicing in Wisconsin to achieve meaningful use of electronic health records to improve health care quality and efficiency in their practices. And while we serve all Wisconsin health care professionals, right now there are financial subsidies for priority primary care providers, which your practice may qualify for.

Connect with your REC today.

WHITEC, operated as a division of MetaStar, is funded through a cooperative agreement award from the Office of the National Coordinator, Department of Health and Human Services Award No.90RC0011/01

WHITEC will provide you with:

- A custom “road map,” based on your readiness assessment
- Vendor selection guidance and resources
- Support for your EHR implementation and optimization
- Resources for information exchange
- On-site technical assistance
- And more, to help you achieve meaningful use of electronic health records, becoming eligible for Medicare and Medicaid incentive payments

What is WHITEC’s cost?

- Our fees are individualized, depending on your practice’s size and EHR status
- Financial subsidies for priority primary care providers continue for the next two years
